

Starter Kit

- **IP66 Lighting controller**
- **2 x 1,000W Outputs**
Soft on/off option
- **Remote**
9 Zone + Garden-On/Off
- **2-Way Wireless Switch**
with 4-gang wireless module
- **Powerful**
1,000metre range
- **Expandable**
Easy to add timers, iPhone, Touch-panel, extra channels

Light Symphony Solution

The kit provides expandable control over 2 circuits with a soft on/off option for dimmable lighting on one circuit. The outputs are individually protected and designed for rough, outdoor life, where start-up currents can exceed 5 times normal load.

The powerful wireless system works reliably through concrete walls, out-buildings etc.

The system is easy to expand by adding extra lighting controllers and the long range provides new installation flexibility as they can be installed wherever power is available.

Build a system around your needs by adding to the starter kit with extra switches, an iPhone*, intelligent dusk/dawn timers or picture touch-panel.
