

Eave Light

As the name suggests the Eave Light is designed to be installed into the eave/soffit of a building to act as a down lighter. Once the canister is installed the flange and lamp assembly is held in the canister by a silicon "O" ring. The total depth of the fitting and canister when installed is 40mm with a 88mm diameter flange.

Finishes Available - Solid stainless steel (grade 316) and solid copper. Please note that the canister is also solid 316 stainless steel.

IP Rating - IP44, pending testing.

Light Source - MR16, maximum 50 watt.

Kit Includes - Stainless or copper flange, stainless canister, tempered lens, quality European 5000 hour lamp, stainless clip and "O" ring.
