

SAFETY INFORMATION

Like all fire and fireplace systems, it's important to run through regular safety checks. Please take the time to familiarise yourself (and any other users) with the safety procedures associated with using your Fire.

- e-NRG is the ONLY fuel to be used in this appliance. Purchase online at www.e-NRG.com or contact your local retailer.
- Check your burner is in good working condition, the shut off mechanism is working smoothly, the filling point is accessible and effective, nothing foreign has fallen into it and make sure there is no visual or physical damage to the burner
- Frequently inspect all around the installation – including lifting the burner out of its position to ensure that no fuel has accumulated in or around the setting at any time
- Take out your operations manual and refresh your memory on the operational procedures for using this product – it's available on our website ecosmartfire.com
- Give your burner a good clean, they can be washed out with hot soapy water and left to dry - or pop it in your dishwasher on the hot pan cycle with detergent (refer to your Operations Manual)
- Check the operation of your jerry can, fire extinguisher, lighter and lighting rod to ensure you have the right tools to use for safely operating your fire - replacement accessories are available from your closest retailer
- Check your fuel supply is stored according to regulations – if you are unsure contact your local retailer
- Check that all flammable items are within safe distance from the flame – that's a minimum of 1500mm [59.1in] at all times in all conditions
- And remember, never overfill your burner, never fill your burner whilst it is in operation or hot, never leave a fire unguarded and never leave children unsupervised
- Educate all users. This type of technology is not well known and therefore we recommend that owners diligently induct any potential user of their fireplace to ensure everyone is aware of the safety procedures associated when using bioethanol as a fuel source.

WHY REGISTER YOUR WARRANTY?

Registering your warranty achieves more than simply activating your warranty - it provides our head office with the information that we require in order to communicate important safety and regulatory information to you should the need arise. To register your warranty, please visit www.ecosmartfire.com/warranty/

This could include things like:

- Prompt notification in the unlikely event of a potential hazard
- Changes to fuel storage regulations, supply channels or special offers
- Reminders about regular safety steps and maintenance procedures
- New model announcements or accessories that suit or enhance your purchase

It is important that we are able to communicate effectively with our customers as part of our commitment to continual improvement, consumer safety and property protection.
